

MUHAMMAD HARIS

📍 Lahore, Punjab, Pakistan ✉ hariszahidrana@gmail.com ☎ +92 321-6614948

Professional Summary

Computer Science graduate and current **Frontend Developer** with a strong foundation in modern web technologies and CMS-based projects. Proficient in **React.js, JavaScript, HTML5, and CSS3**, with proven experience building responsive, interactive, and user-centric interfaces. Skilled in utilizing **Git and GitHub** for version control and seamless collaborative workflows. Adept at debugging, writing clean code, and working effectively in fast-paced team environments. Continuously expanding expertise into **backend systems, cloud technologies, and DevOps deployment pipelines** to deliver well-rounded, scalable web solutions. Seeking to leverage current development experience to transition into a challenging full-time Software Engineering role.

Education

University of Management and Technology, Lahore

Nov 2021 – June 2026

- **BS in Computer Science**
- **Languages:** English (Proficient), Urdu (Native), Punjabi (Intermediate)

Technical Skills

Frontend: HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, JavaScript (ES6+), WordPress, React.js

Backend: Node.js, Express.js, MongoDB, MySQL, RESTful APIs, JWT Authentication

Machine Learning: Python, TensorFlow, Pandas, NumPy

Tools & Technologies: Git & GitHub, Postman, AWS (Basic), Vercel, CI/CD Fundamentals

Professional Experience

Frontend Development Intern (CMS)

April 2026 – Till No

AdamIS Tech

- Develop responsive landing pages and modern web interfaces utilizing **HTML5, CSS3, JavaScript, and React.js**.
- Build interactive, reusable React.js components using advanced state management practices and clean code standards.
- Collaborate closely with design teams to translate **UI/UX** wireframes into pixel-perfect, cross-browser responsive layouts.
- Maintain and optimize CMS-based websites to significantly improve load times, performance, and user accessibility.

Key Projects

GharBaar Estate - AI-Powered Real Estate Platform

gharbaar-estate.vercel.app

- Led development of comprehensive real estate platform with AI-powered features and renovation marketplace
- Achieved 98.22% validation accuracy with ResNet50-based deep learning model for renovation predictions
- Integrated a third-party chatbot API to handle property inquiries and improve user engagement
- Implemented JWT authentication, email notifications, admin dashboard, and advanced search functionality

Netflix Clone

Web Development Project

- Developed a responsive Netflix-inspired web application using React.js, JavaScript, HTML5, and CSS3
- Implemented dynamic UI components, reusable layouts, and modern frontend development practices
- Designed responsive pages optimized for desktop and mobile devices to enhance user experience
- Integrated movie and TV show data APIs to display dynamic content and interactive browsing features
- Focused on clean UI/UX design, performance optimization, and component-based architecture

Brain Tumor Detection System

Machine Learning Project

- Achieved 93% accuracy with Logistic Regression for brain tumor detection using MRI images
- Implemented multiple ML approaches including CNN with TensorFlow/Keras and traditional algorithms
- Applied advanced image preprocessing and HOG feature extraction for optimal performance
- Evaluated models using precision, recall, F1-score, and confusion matrix for comprehensive analysis

Achievements & Recognition

- Execute frontend development and CMS management tasks, contributing to web development initiatives and streamlined collaborative workflows.
- Develop and deploy responsive web projects, utilizing version control, hosting platforms, and modern deployment practices.
- Demonstrate strong problem-solving skills, adaptability, and cross-functional teamwork within a fast-paced development environment.
- Actively expand technical expertise in DevOps concepts, cloud technologies, and modern infrastructure workflows to optimize future engineering and deployment pipelines.
